

# CHAOS

*We're redefining Chaos!*

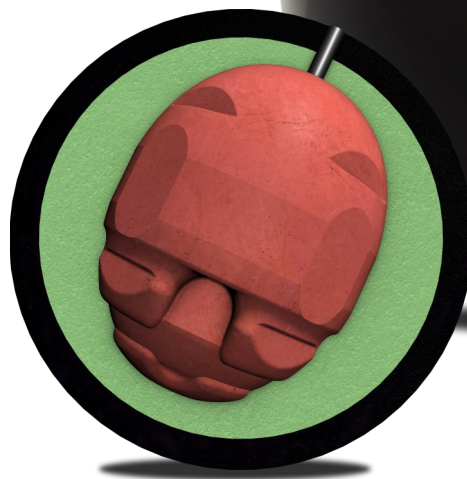

At Columbia 300, we like to live on the wild side. Typically we like to wow our customers with flashy colors and performance that matches. When we create a ball like the Chaos Black that makes head turning change of direction at the breakpoint, toning down the color scheme is a must to keep some sense of order.

## **HYPERSHOCK** TECHNOLOGY

HyperSHOCK Technology (patent pending) helps power the ball through the pins by controlling the influence they have on the ball's path through the deck. Columbia 300 balls with HyperSHOCK not only get you to the pocket, but drive through like no other on the planet.

### **CHAOS CORE**

The Chaos core is a very low RG symmetric core with very high differential. This allows the Chaos to rev up easier enhancing the coverstock's ability to create friction with the lane.

### **EXCITER SOLID**

Exciter is the same coverstock we put on our High Performance Savage line. The inherent nature of this covestock is too be very aggressive in the mid-lane. The factory polished finish takes what is normally an aggressive mid-lane reaction and turns it into a very responsive motion at the breakpoint.

# CHAOS

*We're redefining Chaos!*

**PART NUMBER:** SMCHAOSBxx

**WWID:** 20 June 2019

**WWRD:** 9 July 2019

**WEIGHTS:** 12-16lb

**CORE:** CHAOS

**COVER:** EXCITER SOLID

**COLOR:** JET BLACK

**FINISH:** 500/1000 ABRALON™ Polished  
w/ P.H. Factory Finish Polish

**LANE CONDITION:** MEDIUM TO HEAVY OIL

**REACTION:** SKID/FLIP

**MASS BIAS:** N/A (Symmetric)

WEIGHT	RG	DIFF
16lb	2.50	0.053
15lb	2.48	0.054
14lb	2.49	0.047
13lb	2.53	0.055
12lb	2.60	0.039

**RECOMMENDED CLEANER:**  
Powerhouse Energizer Ball Cleaner
